Education

1.IIMT COLLEGE OF ENGINEERING	Greater Noida
B.Tech CSE(AI)	CGPA – 8.2/10
10/2021 - 08/2025	
2.Vishal International School	Noida
12 th	Percentage: 85%
03/2020 - 06/2021	
3.Vishal International School	Noida
10 th	Percentage: 83%
03/2018 - 05/2019	

Experience

- 1.. **AI and Backend Developer:** Lavi Software and Technology Pvt. Ltd. Onsite – Noida, UP| 06/2025 -Present
 - Worked on **LokTantra** : A civic tech Platform (**React + FastAPI, SaaS Platform**) handling citizen issues, visits, assistants, and areas modules.
 - Developed backend APIs with **FastAPI + MySQL** and integrated **JWT authentication** with **role-based access**.
 - Built dashboards (Reports, Heatmaps, Area Insights) with API-driven insights and analytics.
 - Implemented **AI-powered features** such as **voice-to-text issue logging and multilingual translation**.
 - Researched and developed **Generative AI** applications, including **Text-to-Video generation , Prompt Generator** and advanced AI-driven recommendations.
- 2.**Full Stack Web developer:** CodeVertex services Pvt Ltd Pune, Maharashtra | 08/2024 - 10/2024
 - Using React, improving UX by reducing page load times by 25%.
 - Assisted in building reusable components and optimized UI performance for scalability and better user experience.
 - Implemented features that allowed users to filter job listings, apply, and track applications efficiently.

Skills

Core Competencies	DBMS, OOPS, System Design, OS, CN, Data Structure and Algorithm (C++)
Web Development	HTML, CSS, JavaScript, React.js, Fast API, Pydantic , GSAP, Tailwind CSS , Bootstrap
AI/ML	Python- NumPy , Pandas , Matplotlib , TensorFlow , PyTorch, Hugging Face, OpenCV, Gradio , Langchain , LangGraph , AI Agents
Database	MySQL
Tools & platforms	Git/GitHub, VS Code

Projects

1. PromptIQ | [Link](#)

(React, FastAPI, OpenAI API, Tailwind CSS)

- Built an AI-powered prompt management platform to create, refine, and organize high-quality prompts for content and productivity
- Designed intuitive UI for prompt creation, categorization, tagging, and version control.
- Integrated LLM APIs to generate, optimize, and score prompts based on user intent and context.
- Implemented secure authentication and user-specific prompt libraries with CRUD operations.
- Developed scalable backend using FastAPI with modular services for prompt processing and storage..

2. Fanta (Animated Website) | [Link](#)

(HTML + CSS + GSAP + ScrollMagic)

- Developed a promotional website for Fanta featuring extensive animations and interactive elements.
- Implemented dynamic animations using GSAP and ScrollMagic to create an engaging user experience.
- Gained strong understanding of **UI/UX principles**, web animation timing, and event-based interactivity.
- Focused on **frontend performance**, responsiveness, and user interactivity across devices.

3. LokTantra | [Link](#)

(React, FastAPI, MySQL, Tailwind CSS, JWT Auth)

- Developed a civic-tech platform enabling citizens to raise local issues and track resolution status in real time.
- Built role-based dashboards for citizens, administrators, and officials with secure authentication and access control.
- Implemented issue lifecycle management including status updates, document uploads, and action tracking.
- Integrated RESTful APIs with FastAPI and MySQL for scalable backend operations and structured data handling.
- Designed modular backend architecture with optimized CRUD operations and efficient issue categorization.
- Added **device management** to track active user sessions, enforce device limits, and enhance account security.

4. Text To Image Generation Model

(Python, PyTorch, Hugging Face Diffusers, Gradio, CUDA)

- Created a tool that turns written text into images using the SSD-1B (Stable Diffusion) model.
- Used Gradio to build a simple interface where users can type prompts and get AI-generated images.
- Improved image quality using negative prompts to avoid blurry or low-quality outputs.
- Ran the model on GPU to make the image generation faster and more efficient.

Certifications/Achievements

- Full Stack Web Development - PW Skills
- Solved 300+ DSA Questions on [GeekForGeeks](#)
- Data Visualization – Anudip Foundation
